AbbVie Clinical Pharmacology Research Unit
Information Sheet
www.abbviephase1.com

The health and safety of volunteers and employees is our priority. We have safety protocols in place to keep the unit as safe as possible.

Check In: Monday, 18 April 2022, or Wednesday, 20 April 2022

Bean

Study drug and design:
AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of this study is to determine safety, tolerability, and pharmacokinetics (the amount of drug absorbed into your blood stream and how your body handles the drug) after taking single oral dose under fasting conditions at increasing dose levels in healthy subjects.

Minimum Subject Selection Criteria:
YOU may be eligible to take part in this clinical study if you meet the following conditions:

♦ Healthy men and women 18-55 years old.
♦ Females must be permanently surgically sterile or post-menopausal for 1 year.
♦ Average weight for height (BMI 18.0-29.9).
♦ Not taking any medications or herbal remedies or supplements.
♦ No history of gastrointestinal surgical operations including removal of the gallbladder.
♦ No history of any drug sensitivity or allergy.
♦ No history of drug or alcohol abuse for at least 6 months.
♦ Non-user of tobacco for at least 6 months.
♦ No blood or blood product donation after February 22, 2022.
♦ No other study participation after March 20, 2022.
♦ Must be 6 weeks away from last first in human study.
