Check In: Tuesday, September 26, 2017

**Study drug and design:**
AbbVie is testing an investigational drug, which is not approved by the Food and Drug Administration (FDA) or any health authority, and is not currently available on the market. The objective of this study is to determine safety, tolerability and pharmacokinetics (the amount of drug absorbed into your blood stream and how your body handles the drug) of increasing multiple doses of the investigational drug when given with a second investigational drug.

**Minimum Subject Selection Criteria:**
*YOU may be eligible to take part in this clinical study if you meet the following conditions:

- Healthy men and women 18-55 years old.
- Females must be permanently surgically sterile or postmenopausal for one year.
- Average weight for height (BMI 18 to 29.9).
- Not taking any medications or herbal remedies or supplements.
- No history of gastrointestinal surgical operations including removal of the gallbladder.
- No history of any drug sensitivity or allergy.
- No history of drug or alcohol abuse 6 months.
- Non-user of tobacco for at least 6 months.
- No blood or blood product donation after August 01, 2017.
- No other study participation after August 15, 2017.
- Must be 6 weeks or 5 half – lives away from last first in human study.

**Screening dates:** *(To find out if you are suitable to take part in this clinical study)*
- September 06, 07, 08, 09 (U of I Rockford only), 11, and 12, 2017
- **Additional screening dates may be available.**
- Screening appointments are between the hours of 7:30 a.m. and 10:30 a.m. and take approximately 3 hours.

**Study dates:** *(Please note that these dates and times are subject to change)*
Must complete all periods and/or outpatient visit(s).
